Resources

UA HPC systems are funded through the UA Research Office (ORD http://research.arizona.edu/) and CIO/UIT (Chief Information Officer, and University Information Technology Services)

All UA HPC systems are available to all UA researchers (Faculty, staff, undergrad and grad students, postdocs, etc) at no cost. Presently each user is provided with 12,000 cpu-hours per month standard priority, and this will increase soon with the release of our newest HPC system, Ocelot.

The HPC systems are a shared Linux environment with most of the applications, compilers and programs needed to support your research. Staff is funded to administer the systems and provide consulting services (no charge) for all researchers.
