Policies

Overview

These policies govern access, use, and resources on all HPC systems managed by the UA's University Information Technology Services (UIT). UA HPC systems are funded through UA Office of Research, Discovery and Innovation (ORD [http://research.arizona.edu](http://research.arizona.edu)) and CIO/UIT (Chief Information Officer, and University Information Technology Services).

All UA HPC systems are available to all UA researchers (Faculty, staff, undergrad and grad students, postdocs, etc) at no cost. Presently each group is provided with 24,000 cpu-hours per month standard priority.

Intended Audience

The intended audience for these policy statements are current and prospective HPC users who need an understanding of the accounts and allocation of HPC/HTC resources. This information is provided both as a statement of policy and for educating the user about the use of these systems.
